

A TRUE ESG ENABLER

SUSTAINABLE PLANET
BEAUTIFUL PLANET

SUSTAINABLE PLANET

- **ESG** is about economic growth along with social equality and environment integrity. It's about the development that meets the needs of the present without compromising the ability of future generations to meet their own needs.
- **ESG** is not about climate change, diversity and disclosures alone. It's about embedding the principles - and more across your business- from investment to sustainable innovation.
- **ESG** is about running your business in a manner that is ethical, profitable and sustainable, giving due respect to the environment and local communities.
- **ESG** Compliance and Reporting creates a good public relations story and helps in building a stronger corporate brand
- The SEBI press release said the BRSR will be applicable to the top 1000 listed entities (by market capitalization), for reporting on a voluntary basis for FY 2021 – 22 and on a mandatory basis from FY 2022 – 23. It may be extended to other listed companies also. All the companies have the option to adopt sustainability reporting voluntarily.

About Us
